

Should You Roll the Dice?

Follow these steps to **assess the risk** associated with your decision.

Identify Risk

What could go wrong?

Review Controls

Are the potential rewards more valuable than the controlled risks?

Control Risk

How can I protect myself and avoid risks?

Assess Risk

What are the chances things go wrong?

GO

Life Comes With Risky Decisions

Let's play a game! **Player 1** wants to switch careers, but they're not sure which path is best for them.

Spin To Identify Risk

Identify a decision to understand the risks of your choice.

Spin Odds

Go Back to School

Spin Evens

Start Interviewing

What Are the Risks?

Take on student loan debt.

Get a part-time job and lose income.

Delay building career experience.

Restart in an entry-level role.

Rejected – you have too little experience.

Your career stagnates without a degree.

Next Turn: Assess Your Risk

Consider the potential long-term ramifications of your decision.

Go Back to School

Study at an in-state university and save money.

Get an internship or volunteer on campus.

Job Hunt

Enroll in a private college for a prestigious resume.

Work part-time and pay loan interest.

Hire a career coach to help transition roles.

Build relationships to get a quality job.

Choose a tangential career to highlight your skills.

Get more interviews to land a job quickly.

Spin Again and Control Risk

Risk may be inevitable, but you can often reduce its impact or avoid it entirely.

Apply for scholarships.

Network to support your job hunt.

Earn certifications for valuable skills.

Freelance to support your salary and growth.

Review Controls and Launch Your Career

Weigh your potential rewards with the controlled risk to decide which choice is right for you.

Study and Shine

Go back to school for better job prospects and budget for repayment.

Immerse Yourself in the Industry

Start job hunting today to launch your new career and build experience.
